Are Their Butts

Whether or not they were born with

TWERK-OUT REGIMEN

"When people say my butt's fake, I take it as a compliment," Coco Austin, 35, tells *In Touch* of rumors she's done more than simply work out to maintain her supersize derriere. But Beverly Hills plastic surgeon Dr. William Bruno believes she's had help from a Brazilian butt lift, in which fat is sucked out of another area of the body and inserted into the rear. "It's much larger than before," he says, "and the shape has changed."

THEN

J ... GROW?

Jennifer Lopez was one of the first celebs to embrace her full backside - and has said she'd never consider getting implants. Houston-based plastic surgeon Dr. Wilberto Cortés thinks the 44-year-old "Booty" singer is for real. "Her Puerto Rican genes, combined with hard work at the gym, created one of the most beautiful butts of all times," he says.

THEN

WHAT A (REAR) VIEW!

"Kiss my ass ... 'cause it's finally famous," pint-size Nicki Minaj, 31, raps about her gravity-defying backside, which Dr. Bruno says "seems unnaturally large." The singer "appears to have been enhanced with a gluteal implant or possibly a fat-transfer procedure."

THEN

Real or Fake?

it, these ladies flaunt the junk in their trunks!

VA-VA-VOLUME

Watch your back, Kim! Khloé Kardashian's got a new man ... and what appears to be a new booty, too! "The projection of her buttocks is suggestive of either implants or a Brazilian butt lift," Dr. Bruno says of the 29-year-old's new proportions (a rep for the star calls rumblings of surgery "ridiculous"). "She's much more curvaceous now."

Sister surgery?!

BUBBLE BUTT

Forget the Kardashians; it's hard enough to keep up with Kim's backside! If the reality star, 33, has enhanced her rear, "the most likely procedure would be a Brazilian butt lift," says Dr. Cortés, who rules out butt implants (a rep for the star has denied any enhancements) because "her behind jiggles like a normal butt."
