SUBTLE CHANGES

An almost-perfect Jenny McCarthy, 41, certainly didn't need any enhancements! But "her smile appears unnatural," says Dr. Bruno, adding that "her face looks slightly wider, which could suggest the addition of a cheek filler such as Juvéderm or Radiesse."

**Before:
Just Enough**

KEEPING HER PROMISE?

Sharon Osbourne, 61, has been vocal about her nips and tucks, even swearing off future procedures in 2012, saying her "face looks plastic."

But the resolution doesn't seem to have lasted; Dr. Bruno notes that the *Talk* co-host's "face looks wider and her cheeks fuller, possibly due to weight gain or a filler injected into her cheeks."

DRASTIC MEASURES

Teen Mom star Farrah Abraham, 22, has admitted to getting everything from her boobs to her nose enhanced – even her massive new trout pout. But "her smile looks asymmetric," says Beverly Hills plastic surgeon Dr. William Bruno, who adds that asymmetry at the corner of the mouth "can result from misplaced lip injections."
