Kendall Jenner is only 18 years old and stunningly beautiful. The model has recently come under fire for allegedly plumping her lips, and on Jan. 17, a new [RadarOnline](#) report claimed that she's had a nose job. We spoke with five experts to see what they had to say — see their analysis below!

Kendall Jenner: Nose Job Evidence — Did She Get Plastic Surgery?

Dr. William Bruno, a board certified plastic surgeon in Beverly Hills tells [HollywoodLife.com](#) EXCLUSIVELY:

“It appears that she had a rhinoplasty as her nasal tip appears more refined and slightly elevated. The mid portion of her nose looks to be in better proportion with the width of her nose and her nostrils have an improved contour as well.”
